Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 September 1998.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 18 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Chang et al. (US 6,118,864).

1. Regarding claims 1, 18 and 30, Chang discloses a method for providing forwarding on ring-no-answer for remote telephone extensions (Figure 5B, steps 130, 160, 164, and 136; col. 3, lines 13-15; col. 15, lines 19-22 and lines 28-37; col. 17, lines 43-46) using VOPS (Figure 1A; abstract, lines 5-10; Figure 5B; col. 16, lines 60-65). The method comprises the steps of emulating a tie-line over packet data network (Figure 5, step 136), wherein the emulation comprises passing a ringing state of a telephone interface to a remote VOPS SCCS (Figure 1, item 19; col. 15, lines 54-61; note: the call forwarding is based on ring-no-answer) while maintaining the telephone interface in an on-hook state. Further regarding claim 30, the system processes executable instructions in a computer readable medium (col. 4, lines 8-10).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2, 18 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang et al. (US 6,118,864).

2. Regarding claims 2, 18 and 31, Chang discloses receiving a telephone call from a PBX (col. 17, lines 43-46) to forward over a packet network. However, Chang does not disclose compressing the signals with a processor. One skilled in the art would recognize that voice signals are typically compressed and digitized for transport on packet networks (such as for AAL-2 in ATM networks). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to transmit compressed audio signals over a packet network in the invention of Chang in order to save on bandwidth resources in the packet network.

Allowable Subject Matter

3. Claims 3-17, 20-29 and 32-43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Harper whose telephone number is 703-305-0139. The examiner can normally be reached weekdays, except Wednesday, from 8:00 AM to 6:30 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin, can be reached at 703-305-4366. The fax phone number for Technology Center (TC) 2600 is 703-872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Customer Service Office for TC 2600 at 703-306-0377.
